

BRITISH FRIESLAND SHEEP FACTS

Found

The British Friesland was firmly established in Hampshire and Wiltshire grazing on arable land. The breed has a great ability to adapt to various environments.

Description

The only pure dairy breed in the UK. Large framed sheep with long tail, they have a wool free soft silky face with pink lips and nostrils. Both the male and female have no horns.

Wool

Their fleece is fine and white used mainly in hosiery and knitwear.

Breeding

The BIG Sheep tourist attraction have a Ram show. A variety of rams perform and strut around on the stage in the Sheepy Shows throughout the year along side various other breeds of rams. The demonstrators educate visitors with facts about the varieties of sheep in an entertaining way.
